SMALL KITCHEN NOTES

Will it fit your kitchen?

Measure first. Then compare the exact model manual with your space. Body dimensions alone do not confirm ventilation, door movement, filling access or a permitted installation.

1 Record the usable space

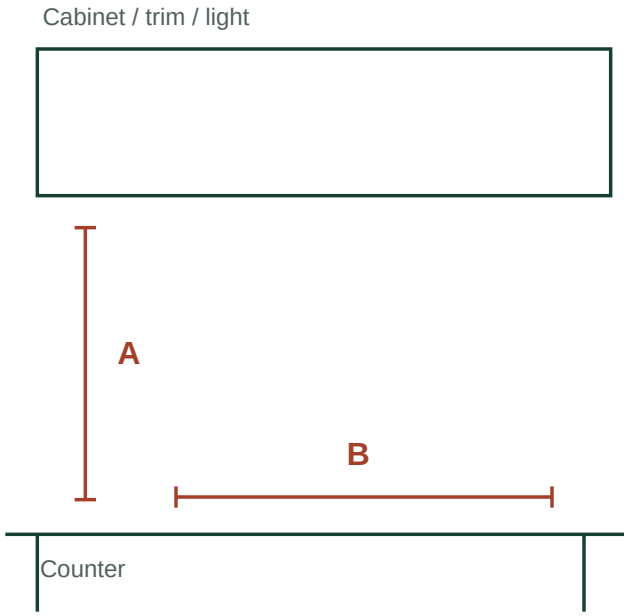

Use one unit throughout: inches or centimeters. Measure the narrowest clear points.

My unit (inches / cm)

A. Counter to lowest obstruction

B. Clear supporting width

C. Usable supporting depth

C: measure depth from the back obstruction to the supported front edge. Diagram is not to scale.

2 Check the space the body size leaves out

Clear space in front for the open door

Access above a tank-fill opening

Hose route, bends and manual limits

Suitable outlet: manual / qualified check

Permitted drain point and hose position

Do not assume a bucket, hose extension, faucet adapter or extension cord is suitable. Follow the exact manual and obtain qualified help where required. Never move a connected, operating machine.

Will it fit your routine?

Take out the dishes you actually use. Keep questions visible while comparing offers. This worksheet does not certify a product, diagnose a fault or approve an installation.

3 Measure your everyday load

Largest round plate: outside diameter

Square plate: side and diagonal

Deepest bowl / tallest glass

Typical daily plates, cups and bowls

Items that must still be handwashed

A plate that fits at an angle may reduce the rest of the load. A place-setting count does not establish your dish fit. Include rims, depth, handles and the spray-arm path.

4 Compare exact models, not similar names

Model A: brand + full model code

Model B: brand + full model code

A: current manual / drawing reference

B: current manual / drawing reference

Unresolved fit, water, clearance or loading questions

Before ordering

Confirm model and condition, seller, delivered total, included parts and return terms. Resolve conflicting dimensions or plate limits with the manufacturer. Check that filling, unloading and the remaining prep space suit your day.
